

# BAGTOR®

**BAGTOR®**  
„Champagne at Ascot“  
€ 49  
<http://www.bagtor.com>  
[facebook.com/bagtor](https://www.facebook.com/bagtor)

leather, metal  
weight: 70g  
produced in Bergamo/Italy

leather strap in black or brown  
nickel-free metal buckle in brass or silver

wrapped in an exclusive, embossed cardboard bag with directions of use and a ring to attach to the zip fastener

**BAGTOR®** is a new and patented system, that protects bags from theft. It is a playful, discreet and nifty tool that can be put on quickly and easily. BAGTOR® connects every bag firmly with anything and consequently prevents „Grab and Run“ thefts. The soft leather strap can also be attached directly to your body. There are no bounds – use your creativity and wear Bagtor© as a bracelet or a belt or as a high fashion accessory.

## How did you get the idea to invent an anti-theft device for bags and purses?

*Nin Prantner:* My own experience - what else. I was at the beach in Barcelona and had my purse in eyeshot. But suddenly it was gone. I saw the thieves still running so I chased them and eventually I got everything back. But I never wanted to experience this again - fool me twice, shame on me.

## But Bagtor© turned out to be way more than just an anti-theft device...

*Nin Prantner:* I wanted to create something pretty, that you actually like to wear. It would have defeated the purpose, if you wouldn't want to wear it because it looks dreadful. And the concept works. Currently I'm working on expanding the line to a wider range of colors, because after all Bagtor© is supposed to match your bag and your outfit.
